### **RESCUE DIVER COURSE**

Enhance your own self rescue ability as you undertake the challenging and rewarding Rescue Diver course. This course will expand your knowledge and experience level as a diver and is the first step into a leadership role in diving. Rescue Divers learn to look beyond themselves and consider the safety and well being of other divers. Although this course is challenging, it is a rewarding way to build your confidence, gain more experience under supervision, and improve your personal diving skills. Rescue Diver training will prepare you to prevent problems and, if necessary, manage dive emergencies. Many divers say this is the best course they have ever taken. You will cover:

- Self-rescue and diver stress
- Emergency management and equipment
- Panicked diver response
- In-water rescue breathing protocols
- Egress (exits)
- Dive accident scenarios

To participate we ask that our candidates have healthy lungs (no tobacco, vaping, or smokeless tobacco products), and have logged a minimum of 20 dives. Come have some fun with us as you meet the challenge and progress along the PADI system of diver education and take your first step into a leadership role.
